

Prolotex™ Soothing Fit Far Infrared Knee Band

Supportive but non-restrictive for gentle pain relief and increased circulation in your knee.

Use the Soothing Fit Knee Band For:

- Arthritis Joint Pain
- Swollen Knees
- Pre and Post Surgeries
- Cold Knees
- Warmth
- Bursitis
- Fibromyalgia
- Suitable for those with edema or diabetic conditions
- Osteoporosis
- Injuries

You can wear Prolotex™ SOOTHING FIT - Knee Bands during normal daily activities and while you sleep at night. These unique Knee Bands can be used for everyday activities while still supplying superior therapeutic healing.

Far Infrared Rays emitted from the Bio-ceramic impregnated fibers in the knee bands improve the microcirculation of the cells & tissues in your knees and calves. The improved blood circulation helps to energize dormant cells. Increased molecular activity will help reduce inflammation, swelling and pain.

This new design features a "Tapered", shaped, knee sleeve. The 4 way stretch helps prevent pinching at the back of the knee and will easily conform to swollen, puffy knee joints without strangling or restricting vital circulation.

"I have worn the band 1 day now and already experiencing great relief in the discomfort of knee pain. Thank you so much" .Barbara C. UK
